Holliston, MA 01746

Dear Eric:

This is an update on our experience with the Burner Booster over the course of this heating season just ended.

Based upon degree day compensation, we have experienced fuel savings of roughly 31% as compared with the heating season of 2010-2011. Those results are remarkable, and provide for an ROI over less than two years.

We at Acme Staple would recommend the equipment to any user spending (at current prices) \$10,000 or more since the savings would likely be in the \$3,000 range and provide a ROI of 36 months or fewer. That's a pretty good investment.

I grew up in the heating business, and, in fact have owned a retail fuel business. I cannot recall an improvement in equipment and process which has shown as much promise as yours shows. This technology has legs in my opinion, and clearly should be considered by any volume user.

Regards,

A handwritten signature in black ink that reads 'V. Robert Gennert'.
