Mr. Eric LaVoie
Energy Efficiency Solutions.
37 Pope Road
Holliston, MA 01746 July 9, 2014

Dear Eric:

I just wanted to drop you a quick note to say how very pleased we are with the results being achieved using the two Burner Booster systems at our facility here in Rutland. This has been the best investment I have seen in my time here at Genesis in regards to energy savings. The savings and service is nothing less than outstanding! But more important we don't have the smells from our boiler room and the boiler room is not half as hot and uncomfortable to be in. I'm also impressed on how clean they both burn, it is great not to smell boilers running from when I get out of my truck to go into the building.

I have been tracking the savings on our boilers, (forced hot-water and one steam) and we are seeing an unbelievable savings in comparison of our past traditional usage. Savings on domestic hot-water fuel usage is over 25%. While during this entire heating season we are holding at a wonderful 27.2% savings; calculating for heating degree days.

I must admit many think the savings too good to be true, but I have a surplus in my heating budget after taking on the coldest winter I can remember. I also want to thank your rapid response in correcting and assisting on some issues that were non-Burner Booster related. I hope my company expands its use of the Burner Booster in the other Genesis facilities using oil.

Sincerely,

Robert Corey
Director of Maintenance Operations
